

## Max Trainer Max Total: Why is my belt slipping/loose?

ID: 12070.1

Follow this troubleshooting guide to help resolve belt slipping issues on the Max Trainer Max Total.

Some common complaints may include:

- Belt is slipping during use
- Belt has slack

### Follow these steps to troubleshoot the issue

Tools you may need:

4mm, 8mm hex/Allen wrenches, or the Allen wrenches from the hardware card included with your machine  
Phillips head screwdriver

1. Check the [service manual](#) for the "**Replace the Drive Belt**" instructions.
2. Tighten the drive belt according to the instructions, see photo below (**reference 1**) for assistance identifying parts [\[12070.A\]](#).

(Reference 1)

White arrows indicate the location of the drive belt and pulley.  
White lines indicate the location of the A and B screws on the tensioner arm.

3. If the belt is still slipping, but is slipping less, follow the instructions to tighten the belt tensioner a little further [\[12070.B\]](#).

4. If tightening the drive belt a second time does not resolve the issue, [order an Upper Belt and Upper Belt Tensioner \[12070.C\]](#).

### **Need to order replacement parts?**

## 1 Customer Care Contact Information

**Please contact Customer Care at 1-800-605-3369 for additional help or to order replacement parts. Some replacement parts may also be available for purchase [online here](#). A list of part numbers referenced within this guide can be located at the bottom of this page.**

**Customer Care - Hours of Operation:**

*Monday - Friday 6:00am - 5:00pm PST*

*The replacement part will be provided to you at no cost assuming your machine meets the warranty eligibility requirements. A Customer Care Agent will be able to assess your current warranty eligibility and provide you with your options.*

*Please note that if you did not purchase your machine directly from BowFlex, Schwinn, or Nautilus, we will need a copy of your purchase receipt in order to register your machine for warranty.*
